Field screening of 40% of the MS4 for illicit discharges will be documented and completed by a combination of contracted inspection and in house inspection of catch basins, outfalls, and ponds within the City. The City currently contracts inspections and maintenance services of all stormwater facilities in the right-of-way, provides in house inspection of all privately owned stormwater facilities, and inspects and maintains all publicly owned stormwater tracts in the City. Additionally, trained field staff, inspectors, and contractors will be used to detect illicit discharges through daily operations and observations within the city. Staff will investigate sources of illicit discharges by using a combination of maps, asbuilts drawings, and field work. This screening methodology is expected to continue through the permit period.
