Want to learn how to identify water plants? Interested in saving a lake from the horrors of dense weed infestations? Join us on June 21, 2022, 6 pm - 8pm.

The Lake Weed Watcher Program trains volunteers to survey for aquatic weeds in small lakes in King County, Washington. Volunteers are trained to identify both native and non-native aquatic plants. The goal of the project is to watch for populations of invasive weeds that are not currently known to occur in King County or that have a very limited distribution, but have the potential to spread and cause damage. Detecting these weeds early allows us to stop them before they get too entrenched to remove. *To register, please click on the image!*
