

Preferred Master Plan | BIG ROCK PARK SOUTH

The preferred master plan for **Big Rock Park South** is designed to reinforce the passive, natural environment of the existing property while allowing more flexible uses for all ages and abilities. In addition to trails, picnic areas and gathering areas, proposed park improvements include:

- Parking lot (55 stalls)
- Universal play areas (accessible and inclusive play elements)
- Open meadow for flexible events, lawn games, etc.
- Optional space for a 9-hole disc golf course (with 3 holes integrated into Big Rock Park Central)
- Garden areas to highlight botanical names and plant characteristics (pollinators, natives, etc.)
- Adaptive re-use of existing buildings and unique site features (i.e. chicken coup as whimsical element)
- Central picnic pavilion (old garage removed)
- Interpretive signage to highlight the natural environment and/or history of the site

Universal Play

Includes a combination of natural elements, site furnishings and play features to appeal to all ages and abilities; often a combination of plazas, play, nature, and art elements.

Garden Areas

Engage all the senses through fragrance, movement, textures, and wildlife attractants. Could include sensory gardens, pollinators, native plants, education, etc.

Whimsical Elements

Sculptural elements that provide a sense of discovery throughout the parks; may be along trails or set apart in the landscape.

Disc Golf (optional)

9-hole course, developed with fairways away from trails to avoid user conflicts. Potential layout to be studied further prior to any improvements.

Picnic Pavilion

The old garage, currently in the wetland buffer, will be removed. A new picnic pavilion will overlook the central pond and be developed to allow for larger group gatherings and events.
