2022 Annual Report Section

Executive Summary

Economy: Inflation as measured by CPI-U continues to be a major concern, although it has declined since June. On the national level, the year over year increase was 8.3% in August and 9.0% for the Seattle-Bellevue-Tacoma area, according to the most recent data available from the U.S. Bureau of Labor Statistics. The unemployment rate for August was 3.7% on the national level and it was 2.5% on a preliminary basis for Washington State in July, the most recently available. Seattle-Tacoma-Bellevue area home prices declined in August from July levels, yet are still 14.5% above levels seen one year ago, according to the Case-Schiller, not seasonally adjusted index. The local real estate market has cooled off with homes staying on the market longer and some price reductions occurring.

Revenues: Total revenues through September are \$5.6 million above 2021 levels. Some individual variances are briefly explained below:

- Taxes in total are \$0.6 million less through September 2022 than 2021. Large variances by type of tax are outlined below:
 - *Property tax revenue is \$0.8 million higher through September of 2022 than last year through the same period. This increase is likely due to taking the banked capacity, the 1% allowable increase and new construction.
 - *Sales taxes, including both general sales taxes and the City's share of criminal justice sales taxes are \$0.5 million higher, or 7.2% through September of 2022 compared to 2021. The year over year increase is primarily due to an increase in contracting tax revenues and revenues from services. The increase is also likely due to inflation causing higher prices and therefore more sales tax revenue.
 - *Real Estate Excise Tax revenue through September is lower by \$1.9 million compared to 2021, yet it is still projected to meet budget. The median sales price this year is \$1.62 million, a 21% year over year increase, yet there has been a 36% decrease in the number of homes sold (from 1,181 to 755 this year).
- Licenses/Permits and Charges for Goods & Services categories need to be combined to be compared to prior years as some development revenue accounts have moved between these categories. Combined, these two revenue categories are \$2.5 million higher through September of 2022 compared to September of 2021. This year over year increase is primarily due to development revenues and to a lesser extent a \$0.5 million increase in year over year SWM fees.
- Intergovernmental revenues are \$2.4 million higher YTD in 2022 than in 2021. This is primarily a result of showing both the unspent 2021 ARPA and the 2022 ARPA money in 2022, compared to showing just the 2021 allocation of \$2.3 million in 2021.
- Miscellaneous revenues are \$1.2 million higher YTD in 2022 than in 2021 primarily due to receiving \$0.6 million more in interest income, restitution of \$0.4 million and compensation from an insurance recovery for \$0.1 million in 2022.

Expenditures: Total expenditures through September of 2022 are approximately \$6.3 million lower than they were through September of 2021. Personnel costs are \$1.3 million higher than last year at this time, primarily due to regular step and COLA increases, yet these costs are projected to remain below budget for the year due to vacancies. Police and fire contract spending is higher year over year by \$273,945 due to higher year over year contracted cost increases. Expenditures on debt servicing are \$0 for the year as the debt was paid off in 2021. Capital spending is down year over year largely due to \$7.0 million spent from the Transportation Capital Fund on Issaquah Fall City Road during the first nine months of 2021.

Combined Total: For the first nine months of the year, for all funds, the City's total revenues were \$14.5 million higher than total expenditures. This large year to date variance between actual revenues and expenditures is primarily due to unspent ARPA revenues combined with substantially lower amounts spent YTD on capital projects. When compared to budget, 69% of the annual revenues have been received and only 44% of the budgeted expenditures have been spent.

City of Sammamish Sales Tax September 2022

There is a two-month lag in sales tax reporting, so the results through September 2022 actually represents activity for the months of November and December 2021 and January through July of 2022.

Sales tax revenue year to date is up \$276.397 or 5.2% compared to 2021. The pandemic caused a shift in consumer behavior leading to increased online shopping beginning in 2020 and although the sales levels in many categories remain higher than pre-pandemic levels, they appear to be leveling out, with the monthly year over year increases shrinking. With many forecasts calling for a recession, or saying we are already in a recession, it is difficult to determine if the growth in sales tax revenue will continue. Additionally, some of the tax increases shown are likely due to inflation, where tax revenues are increasing due to higher prices, not the sale of additional goods and services.

General Merch/Misc Retail shows growth year to date and is up \$40,420 or 2.0%, with the sub-categories containing sporting goods, clothing and furniture contributing the most to the increase. However, overall spending in this category slowed over the last few months and posted year over year monthly declines in many sub-categories. The largest sub-category decline was in building & gardening.

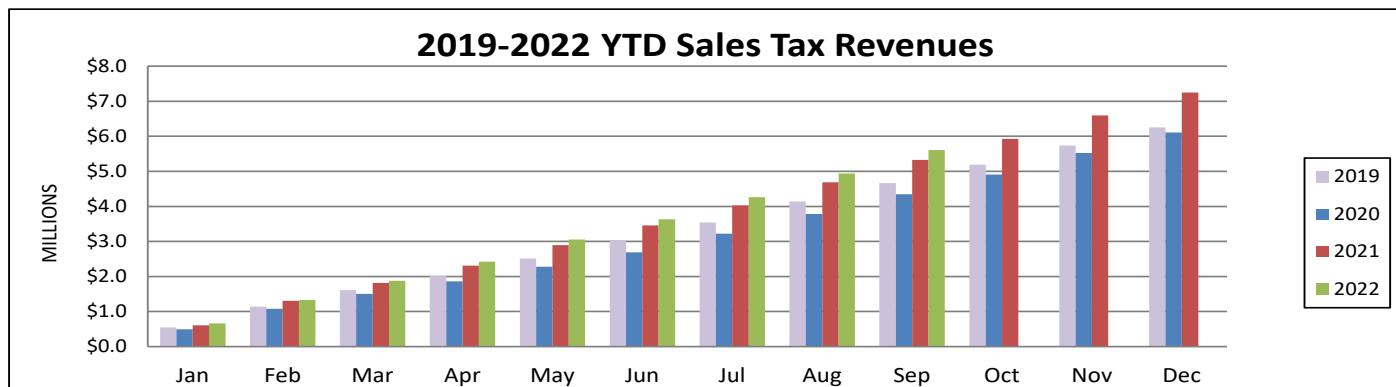

Contracting revenue is up 8.3% or \$114,129 when compared to the same time period a year ago, with construction activity picking up in the summer months. This category historically represented 36-39% of the total sales tax revenue. The percent it contributed declined over the last few years as online purchases of general merchandise increased and construction slowed, and it is now increasing as a percentage due to both construction increases and a slowdown in the growth of online purchases.

Services revenue is up \$81,842 or 8.5% YTD. The services category contains many types of services with the largest increases coming primarily from four sub categories. The first sub-category is arts and entertainment, including golf courses and gyms and this category is up 39.5% or \$25,631, the second one is called administrative support which contains online services, and this sub-category is up 3.7% or \$22,288, the third sub-category is other services, which contains laundry and other personal services, and this sub-category is up 21.1% or \$13,660 and the fourth largest sub-category contributing to this year over increase is publishing, up 23.7% or \$10,392 compared to this time last year.

Miscellaneous revenue is up \$23,852 or 5.8% YTD. Within the miscellaneous category, the largest increase was from the state pool sub-category. This category was up 14.5% or \$19,871. The state pool sub-category contains revenues that have not yet been classified to a category, so the variation within this category is difficult to analyze. The other sub-category called transportation & warehousing was up \$13,512 or 3043.2% and contains delivery services. This increase over the prior year is likely due to a recent reclassification of these revenues from a different sub- category. The sub-category of manufacturing has decreased by \$29,074 or 26.6% compared to last year.

Retail Eating/Drinking revenue is up \$16,695 or 7.4% compared to last year. This is most likely due to Covid-19 measures that were in place last year and fears of dining with others due to Covid. The current revenue levels are comparable to the pre-pandemic levels, although revenues from individual establishments have changed with some businesses closing and new ones opening.
